Descriptive title of analysis
2022 Datathon for ElderNet

Team 1/2/3/etc.

February 03, 2022

Executive Summary (1 page)

This section should have up to 5 bullet points summarizing the main conclusions from the analysis. These should be worded in such a way that people who are not data experts can easily understand what actions could be considered given the analysis results.

Contributors (1 page)

This section should list the names and 1-2 sentence descriptions of everyone who worked on the submission. An example is listed below (please replace the example with your own info).

Gritty McGritty, MSc is a data scientist with Philly's DataForGood nonprofit, and a student of applied statistics at DataIsLife University. In both roles, Gritty enjoys conducting predictive analyses and natural language processing.

Problem definition and dataset (1-2 pages)

Summarize the research question/area your team has worked on.

Working definitions

Include here any working definitions that you used (beyond what was outlined in the general description)

Data issues

Include any issues or challenges that you noticed in the data, that may be relevant, and any actions taken

Results (3-5 pages)

You may structure this section in any way that makes results easier to understand and describe.

Conclusions and Next Steps (1 page)

This section should have a bulletpoint list of what conclusions can be drawn from the analyses that were performed, and what next steps should be taken by JAT or anyone working in this area
